On November 25, 2015, BHE filed with the Board a proposal that establish minimum safety standards for farm taps as a condition of service; creation of a mandatory testing program; utility replacement and ownership of customer-owned natural gas service lines; authorization for recovery of replacement capital costs; and request for an accounting order to defer testing costs until the company's next general utility rate case.

On July 5, 2016, the Iowa Utilities Board (Board) issued [an order](#) addressing a revised customer notice and the BHE request and ordered BHE to send the amended customer notice to all of its customers since all customers may be impacted depending on the final outcome of the case.

The Board's July 5 order also established a new intervention date for Monday, September 26, 2016. This new date is after the customer meetings and will give potentially affected customers or any other interested parties the opportunity to decide whether to intervene after having a chance to participate in the customer meetings.

Following the intervention date, the Board will set a procedural schedule for further actions in this docket.
